DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1-6 are rejected under 35 U.S.C. 102(a) as being anticipated by JP 2000-067898.

The reference is directed to a fuel cell system comprising a fuel cell (11), and first and second hydrogen occluding devices (14, 15) located downstream from the anode outlet (see abstract; Fig. 2). The devices are inherently “easily hydrogen occluding” and “easily hydrogen releasing.” The second device (15) is capable of occluding hydrogen released from the first device (14). Regarding claim 2, the devices are connected to the anode inlet line (18) such that hydrogen may be supplied from the devices to the fuel cell. Regarding claims 3 and 4, the release of hydrogen is controlled by a heating loop (50). Regarding claim 5, the devices are flow-through type tanks. Regarding claim 6, a heat exchanger (42) is provided in a supply conduit to the fuel cell.

Thus, the instant claims are anticipated.
